Serial No.: 08/541,301

Remarks

Applicants respectfully submit that the above amendment places the application in condition for allowance.

Claims 27-46 are in the case. Claims 1-5, 7, 10, 11, 13, and 18-22 are canceled without prejudice hereinabove. Claims 27-46 are added hereinabove. No new matter has been added.

Claims 1 – 5, 7, 10, 11, 13, and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kralowetz, et al in view of Lahtinen. Claims 13, and 18-22 are also rejected under 35 U.S.C. 103(a) as being unpatentable over Kralowetz, et al in view of Pohjakallio.

Applicants respectfully disagree with the Examiner's position that Kralowetz, et al. "...suggest...:" that the proxy engine is at or even above the application protocol layer. For the reasons stated in the preliminary amendment Filed April 3rd, 2000 and in the amendment filed January 17, 2000.

However, Applicants request that claims 1–5, 7, 10, 11, 13, and 18-22 be cancelled without prejudice, and claims 27-46 be added. Claims 27-46 limit the application protocol layer to the short message service application protocol layer and these claims limit the reference parameter corresponding to the position of the fragments in the message to be a reference parameter corresponding to a number indicating the position of the fragments in the message. Applicants respectfully submit that claims 27-46 are allowable.

Claims 27-46 are supported by the specification as originally filed including originally filed claims and Figures.

Particularly, Claim 27 is supported for example on page 2, lines 27-33, page 7, lines 10-22 and lines 23-33, and page 5, lines 5-24, of the specification, which states that a short message entity divides the message (page 5, lines 3-6) at the application protocol layer (page 5, lines 12-14) of the short message entity, which is the short message service (SMS) application protocol layer.
